SENATOR KENYON RESIGNS, GETS JUDGESHIP LIGHT EARTHQUAKE FELT IN CALIFORNIA TODAY DEMOCRATS BEATEN IN LATEST REFUNDING MOVE

INITIATIVE SURVEY OF Knickbocker TRAGEDY COMMENCE WEDNESDAY

REPORT SPARED TO
MING GUILTY ONES
TO JUSTICE.

SEVEN PREVIOUSLY
LISTED DEAD ARE
LIVE; NUMBER IS 95

Deaths of at Least Three of Vic-
tims Expected During the
Day or Night.

WASHINGTON, Jan. 31.—The federal grand jury, under the direction of District Attorney Payne Gordon, went to work in earnest today in its investigation to fix responsibility for the Knickerbocker theater disaster, while all Washington mourned and plans were completed for the funerals of the scores of victims.

Estimates of the number of dead ranged to vary around a hundred. It was expected to be augmented by the day by the deaths of three persons who were fatal victims of Saturday night's crash. They are: Dr. Clyde Garrow, Miss Mary Upshaw, and Edward William H. Shaughnessy, second assistant postmaster-general, who was in a serious condition yesterday, was reported this morning as greatly improved. Hospitals were still crowded with the injured today, many of the victims being permanently maimed.

After checking and re-checking the lists of dead and injured, the police announced today that the official list now shows 95 persons lost their lives. This figure may still be changed. Seven of those reported killed were found last night in Washington hospitals. In several other instances names had been duplicated.

The huge piles of debris at 18th Street and Columbia Road, were being hauled away today, leaving nothing at the scene of the disaster except the giant walls of the theatre. These have been ordered torn down by the building inspector. Police were keeping curious persons away from the wrecked theatre, fearing the walls might tumble down upon them.

In addition to the grand jury investigation which will be pushed rapidly, the Senate today is expected to take action on the resolution of Senator Capper, of Kansas, ordering an inquiry into the construction of the Knickerbocker Theatre and all other buildings erected in Washington during the war. The resolution already has been acted upon favorably by the senate committee by the District of Columbia, and its adoption probably will be effected soon after the senate convenes today.

The grand jury is receiving assistance from engineers of the war and navy departments, collecting a mass of evidence bearing upon the construction of the theatre which will be placed before the jurymen when the actual inquiry gets under way.

Coroner J. Ramsey Nevitt, drawn in a special jury to investigate the catastrophe, announcing that testimony will be taken a week from today. The coroner's jury is expected to complete its inquiry within one day and will make its recommendations immediately. Officials said to-day that it was entirely probable that action taken by the coroner's jury would lead to the arrest of persons charged with criminal negligence in connection with the collapse of the Knickerbocker roof on Saturday night, causing the crushing of the hundreds who sat below.

In the meantime, the grand jury will be at work and it is entirely probable that the first official action in assigning a definite cause for the accident will come from this source, rather than from the coroner's jury. The outcome of the investigation, now in progress, may arrests have been made and there appeared to be an inclination on the part of officials to detain persons who might

SOLDIERS' BONUS IN TWO WEEKS

WILL BE VOTED UPON
IN CONGRESS WITHIN
THAT TIME, REPORTED

WASHINGTON, Jan. 31.—Representatives of the American Legion, appearing today before the House ways and means committee, were assured that a soldier bonus bill will be reported favorably to Congress within two weeks.

"We will have to work fast though," said Representative Green, Republican of Iowa, acting chairman.

You should," said John T. Taylor, chairman of the Legion legislative committee. "From \$60,000 to \$60,000 service men are out of work, and there is still work against the government."

"They cannot understand," continued Taylor, "why Congress is haggling over the cost. Being in dire need, they have no proper prospective. Passage of this legislation will be treason because it will help the country to recover during this reconstruction period."

The American Legion has a membership of something over one million or about thirty percent of the ex-service men and women.

About 80 percent of the American Legion members will take the insurance feature of the adjusted compensation bill," he declared.

"How about the 3,000,000 ex-service men not members of the Legion?" demanded Representative Garner, (D) of Texas. "Will they not take cash?"

"I cannot speak for them," replied Taylor. "They may want cash. Many of our Legion members could not be hard pressed last year there could not pay their membership and post dues."

Representative Hamilton, (R) of New York, asked how the granting of the present bonus would affect possible future claims for pensions.

"So far as able-bodied and unemployed ex-service men are concerned, it will be a quiet claim on the government," declared Daniel Steck, of Iowa, a member of the Legion's executive committee, who quoted from minutes of the committee to that effect.

Resident of British Columbia recently imported a swarm of Dutch bees.

First artificial eyes were made of gold and silver, then of copper and bronze.

As implemented through recommendations made by the two boards of inquiry.

The senate board of inquiry will make a preliminary survey of the Knickerbocker tragedy at a meeting tomorrow. Senator Capper, (R) of Kansas announced today.

An investigation probably will be started soon and copper and bronze used in the artificial eyes for the blind.

He opines a year by any length.

He says that his countrymen have suffered enough and the Fatherland must not be subjected to any further upbraiding.

Today I am going to press the continuation of talk of former Kansas senator Capper, (R), of New York, to his son, Senator Capper, (R) of Kansas.

He opines a year by any length.

He says that his countrymen have suffered enough and the Fatherland must not be subjected to any further upbraiding.

As you know, he writes, I have always maintained, the newspaper that the Germans exist for the sake of the people, not the people for the sake of the nation.

AWAY FROM HOME NOW
AND 33 YEARS AGO.

How much do you use the railroads? You are not getting your share, on the average, unless you made 12 trips a year and travel a total of 456 miles.

Thirty-three years ago the average American used the railroads eight times a year, traveling a total of 192 miles.

Now, 30 years isn't so long ago. The year 1889 is fairly fresh in the memories of millions.

You look at the figures on railroad passenger travel, and your comment probably is: "We certainly are stepping out. Times have changed amazingly."

The period of civilization in which we live is most wonderful in the way it has conquered space.

Maybe you are one of the lucky who can recall a boyhood in a country town—and the thrill of going down to the village depot to watch "No. 17" steam in with a shrill screeching of brakes.

Out yonder, beyond the horizon, lay the Great Unexplored.

You recall your envy of the village banker when he returned from a trip to New York or some other metropolis.

To travel 50 miles by railroad back in President Harrison's day, was a boyhood treat beyond the dreams of avarice.

Today the boy yawns as he climbs into the Pullman for a trip of 500 or 1,000 miles. It's interesting, but not out of the ordinary, what he yearns for it to fly in that steel airplane overhead.

Travel "far from home" once was a thrill even for the grown-ups. Now it's rather a dull necessity of a blasé age.

In 1889, the thrill of railroad travel was somewhat deadened by a subconscious fear of "gettin' killed by the cars."

In that year 472,000,000 people were carried by the railroads, and the chance of being killed in a smash up was one in 1,523,000.

Now the railroads haul 1,300,000,000 passengers a year, and the chance of being killed has been cut to one in 5,673,000.

Airplane travel will be similarly made safer and safer as the years slip by.

The rising generation may be fatigued for airplane travel. That's where it's getting its thrill now—watch the flying machine.

It is a real thrill—probably not as much to the youngsters as to us grown-ups; for the youngsters have so many tricks of magic, like the wireless telephone, that they must be getting beyond thrills.

But the thrill of watching "No. 17" steam into the village depot in 1889 wasn't half bad—eh, pa?

The Englishman developed his strong, square jaw during centuries of chewing tough food, especially roast beef. Beef is more tender now, or the English are keen for hash or other soft "vitamins," for the English face is changing. The jaw is narrowing. It is a pronounced and permanent change, says Sir Arthur Keith, British anthropologist. The human body changes shape to fit environment. Auto riding is weakening the legs of Americans. Smoking has given us protruding lips. Stoop-shouldered office and shop work has made an erect carriage of shoulders and backbone exceptional.

At Sing Sing the official executioner gets \$150 for each murderer he sends to death in the electric chair. His income last year was \$1,650 for 11 "jobs." There are more desirable jobs. That such an occupation is necessary, or even considered necessary, emphasizes that so-called civilized man has not yet shaken off savagery. Before the present century ends, the murderer will be turned over to insanity experts, surgeons or ductless-glands experts, instead of to the executioner.

To make sure they're not getting poison liquor, some thirsty ones make the bootlegger take a drink first. If the bootlegger is willing to drink his own stuff, the foxy customers reason that it must be all right. Two veteran bartenders have just died in St. Mary's Hospital, Hoboken, N. J., after being blind several days. They sampled some of the "sure stuff." It was wood alcohol. It never bartenders can't recognize wood alcohol by smell and taste, what chance has a customer? Undertakers know.

Helen Keller and Willeta Huggins, both of them blind and deaf, meet at Madison, Wis. They converse with each other, using fingertips on face and chest to receive vocal sounds. Miss Keller has many questions about Miss Huggins' famous ability to distinguish colors by her sense of smell. Then she said: "Many marvelous things in the world, but nothing so wonderful as the adaptability of a human being. All handicaps can be overcome by will power."

A first class highway to connect Muscle Shoals with Atlanta is started by southern chambers of commerce. They are anticipating great industrial development if Henry Ford's offer for Muscle Shoals is accepted by the government.

This gives you a glimpse into the future, when the development of America will follow water power projects, just as the building up of the west after the Civil War followed railroad construction.

Today the boy yawns as he looks at the Pullman for a trip of 500 or 1,000 miles. It's interesting, but not out of the ordinary, what he yearns for it to fly in that steel airplane overhead.

An example of Scottish wit is the story in the Edinburgh Scotsman of an absent-minded man who was out in a boat which upset. He went down twice before he remembered he could swim.

Think of it—your artillery will be equal to anything you have seen on other people's tables at half the price.—Ad in London Blade.

Opponents of capital punishment would probably be willing to have the murderer apologize to the bereaved widow.—London Blade.

Does reciprocity with Canada mean that we will have to send back the bottles?—Life.

Disarmament—say it with powder.—Life.

RENEWED TESTIMONY

Where moonshine comes from is a secret still.—New York American.

Why Florida People Live Longer

By DR. G. M. RANDALL

Life insurance companies base their rates of insurance on the cash value of a man's life and the length of time he may reasonably be expected to live. This is spoken of as "man's expectancy," and is arrived at by mathematical calculations of actuaries, statisticians, physiologists and physicians.

Many factors enter into the computation of man's expectancy of life: his inherited tendencies; his parents may have been weakened by tuberculosis, alcoholism, insanity, hookworm or other degenerating factors; his acquired tendencies since his birth; his hearing or vision may be deficient; his occupation. If he is a lineman for an electric light company or telephone company, his expectancy is less than that of a ribbon clerk in a dry goods store. Likewise, a locomotive fireman's expectancy is less than that of a clergyman; a physician's life is shorter than that of a clergyman or a lawyer. His residence, whether in city or country; whether he is an inhabitant of mountainous or sea-level zones, whether in torrid, frigid or temperate zone. Factors of longevity other than climatic are not for present consideration.

In studying so far as possible the lives of 1,280 men who have lived upwards of 100 years, from Methuselah to the present time, we observe that with but 65 exceptions all have lived in the semitropics, and incidentally we note that 88 per cent of the 1,280 were practically vegetarians.

The expectancy of life of a Cree or Sioux Indian papoose at 1 year of age in Saskatchewan and Alberta is 42 years, according to the British census. The expectancy of life of an Eskimo baby at two years is 32 years. Take another extreme; in the mountains of Mexico the normal expectancy of life is 82 years, this owing to the suitable climatic conditions and consequent ease of life. Darwin's philosophy of the survival of the fittest becomes an axiom when one stops to think that man is the only living animal or plant or tree that actually inhabits all zones of the earth, and this with a fair degree of comfort and choice. This is because of intelligence to clothe himself with furs in the frigid zone, or with a fireeschelot in the torrid zone, and all conventional modifications between the antipodes.

The object lesson taught by the world in our building of the Panama Canal will be a potent factor in changing the future centers of population in North America. The Panama canal was built by the medical profession. Malaria and yellow fever were factors that the French engineers could not vanquish, and that established a ban against which was the cause of their failure. Engineering problems were the same in 1880 as when Delessert failed in his purpose. There was no question of the engineering ability of the French, but they did not know bacteriology, and bacteriology dug the ditch.

Today the Canal Zone is a health resort. It is perfectly sanitary. The death rate per thousand per year in Portland, Me., at the last census was less than any other city in the United States, with one exception, and that was a city in Florida. In 1914 the death rate in the Canal Zone was exactly the same as Portland, Me., in 1910. While the problems of sanitation of the Canal Zone do not apply here, some of Ex-Surgeon General Gorham's remarks may be apropos. He says: "When the great migration of population has commenced, I believe the needs of today will look back to the work of the Canal Commission and the sanitary work it performed, as of more importance than the canal itself, more important than ten canals."

The Panama Canal zone is the first example of disease-free life in the middle belt of the world, and it is not too much to expect that great tropical empires will again come into being, such as existed in the early history of man, that is, Nimech, Egypt and Babylon.

The great white civilization of the north, Europe, Asia, Australia, etc., is a considerable factor that continues to increase in Florida. No sudden change of temperature or humidity can reduce the normal body temperature, i.e., energy, or combat the action of an excretory language, as a certain amount is required to maintain its heat. There is, in consequence, a greater propensity to be ill.

It is not in the sun but in the shade that is always cool, and nearly always there is a gentle breeze. The nights are unusually serene. One thermometer shows 80° in the shade and 70° in the sun.

A WORD ON ADVERTISING

Many individuals believe that advertising
helps to sell their products and services.

But, how can advertising
make selling of a product or service
more effective? This is a question
that many people have asked
for the answer. And, the answer
is simple. Advertising must be
done in a way that will
attract the attention of
the customer and
make him want
to buy your product or service.

Important Meeting Hospital Interests On Thursday Night

COMING EVENTS IN THE TRIPLE CITIES

Probably the most important meeting held in the interest of the hospital since the work was started will be the one to be held Thursday evening at the City Hall. Election of a permanent organization committee and consideration of a charter for the institution will be taken up, as well as consideration of the name for the new hospital and other points equally important.

This permanent organization committee is the most important and most honorary group that has yet been appointed or elected. Members of this committee will have many executive functions and act in an advisory and judiciary way on all the more important work. They will be elected by the general group consisting of those present to cast votes among the representatives chosen appointed by the various organizations in case who may be appointed to it Thursday evening.

Wednesday afternoon, Feb. 1, 2:30 o'clock, meeting of Daughters of the American Revolution at Palmetto Clubhouse. Hostesses, Mrs. J. P. Esch and Mrs. C. H. Raynor.

Wednesday morning, Feb. 1, at Palmetto Club, rehearsal of ladies chorus of the club, 9:45.

Wednesday evening, Feb. 1, at Auditorium, Frieda Hempel, world's greatest soprano in concert.

Wednesday evening, Feb. 1, regular mid-week prayer meeting at all local churches.

Thursday afternoon, Feb. 2, at Palmetto Club, regular meeting, with Dennis McCarthy, Irish immigrant poet in reading of his poems.

Thursday evening, Feb. 2, at Auditorium, entertainment under auspices state tourist clubs of Triple Cities in benefit of Postboy Park, Daytona Beach.

Friday evening, Feb. 2, 8 o'clock at City Hall, meeting of hospital committee, consideration of a charter and other hospital business. Public cordially invited.

Thursday evening, Feb. 2, at Casino Burgoynes, Old-Fashioned Barn Dance, benefit of Daytona Baseball Club.

Friday morning, Feb. 3, at Palmetto Club, Artists Recital with Miss Leota Gourdin, Mr. Little and G. E. Penney in concert.

Friday afternoon, Feb. 3, at First Baptist Church, afternoon and evening Flying Squadron will hold meetings.

Saturday afternoon, Feb. 4, card party at Palmetto Club, regular weekly.

Saturday, Feb. 4, at First Baptist Church, afternoon and evening Flying Squadron will hold meetings.

Sunday evening, Feb. 5, at Auditorium, Flying Squadron will hold meetings.

Sunday afternoon, Feb. 5, at Auditorium, Open Forum with Roger Baldwin, world's greatest statistician and business expert in address, "What is Your Mother with Business?" Bryant and Folley club members attending in force.

Monday afternoon, Feb. 6, at Palmetto Club, "County Federation Day," Feature of meeting is details on our town. Resolved that the motion picture as it is conducted today is a destructive rather than a constructive agency." Four clubs of the county in debate.

Monday evening, Feb. 6, Rehearsal of Peninsula Choral Society.

Tuesday, February 7, opening of two-day annual mid-winter bazaar of St. Mary's Guild of Episcopal church, Guild Hall.

The day has come when it is necessary to adopt a name for the new institution. There has been discussion of terms and titles through the columns of the local newspaper's relative at different times and every reader should come Thursday evening prepared to discuss the question and arrive at a decision. Others who have suggestions should send them to committee headquarters at once and they will be presented for consideration at the meeting. It should be understood that until a name has been adopted a charter cannot be issued by the city gift and contributions be received.

Various organizations are expected to give progress reports at the meeting particularly the winter reading club of residents, which are now steadily under way.

Mr. J. Paris and daughter, Horace and Virginia left Daytona Monday for Brooklyn, where they will be Mr. Paris, who preceded them there. The beautiful Paris girl from South Beach great beauty in Mr. Paris' business. In fact so necessary that that New York, as their home in Brooklyn has again been. They hope to be able to return to Daytona by October, with perhaps to South America before Capt. and Mrs. Baldwin's parents, who were there earlier in the year, are winter at Tampa.

R. A. Baldwin and his wife, daughter, Stacey Ellen, will return afternoons for a while to remain for a while. Mrs. Baldwin's mother, Dr. Mrs. W. D. Baldwin, formerly of Atlanta, Georgia, is present here to help where she has a home in the welcome her. Later the family will return to their trip to South Africa.

Mr. and Mrs. Baldwin have made their home in Daytona for past year and their many friends are to see them leave.

David Carson Dies While In Arizona; Body Brought Here

We received news of the death of David Carson, 41, of Phoenix, Arizona, this morning. Carson went to Arizona about two weeks ago thinking the climate would be healthful for him. He had been ill for some time. His wife, Mrs. Mary Carson, died last year in this city and a son was born during marriage. The body will be brought here for burial. The funeral service, officiated by Rev. D. Stratford Seeling, will be held at the Southern Baptist Church. Mr. and Mrs. Carson have made their home in Daytona for past year and their many friends are to see them leave.

Tonight "Ladies Night" At Daytona Rotary Club

Tonight is "ladies night" and the rotary club and the women's division of the rotary will be held at 7 o'clock at the club.

Dr. Denis A. McCarthy, of Weston, will preside over the meeting and will speak on one of his topics of love.

The meeting will be in charge of the women's division, of which Mrs. Freda Penney, president, and it is well known that the meeting and entertainment features are arranged.

Barn Dance Will Be Given at Nine O'clock Thursday

The Barn Dance will be given at nine o'clock Thursday evening at the Auditorium.

Admission is 50 cents.

HOTEL RIDGEWOOD

Mr. and Mrs. Lewis N. Dibble and Mrs. E. J. Murphy of Springfield, Mass., are the first guests to arrive at the Ridgewood hotel by way of Washington since the snowstorm held up traffic in the national capital. They started for Daytona just as the hurricane was spending its force over the Middle Atlantic states, and report some trying experiences with railroad schedules. On the way South they started from Baltimore on a passenger train at 10 o'clock one morning and did not reach Washington until 6 o'clock that night, a run that ordinarily requires about two hours. They were delayed to such extent that they arrived in Daytona 24 hours later than they had planned.

Mr. and Mrs. T. W. Dunn, Mrs. J. Lahey, Miss Josephine Murphy and John Murphy of Jacksonville, who are motoring to Miami, stopped at the Ridgewood for a short stay.

Mr. and Mrs. George Wrenbury, accompanied by their son and his wife and Mr. and Mrs. J. C. Percy, all of New York, stopped at the Ridgewood on their way to Miami.

William H. Bryant and family of Boston, who are traveling by auto to west coast points, were guests of the Ridgewood for the first part of the week.

Misses Lillian and Beatrice Adler, Miss Frances Goldman and John H. Adler, all of New York, are spending a few weeks at the Ridgewood.

David J. Sheehan and William Fogarty of Lynn, Mass., are at the Ridgewood for a month.

George Ryan Roth, accompanied by his parents, Mr. and Mrs. J. H. Roth of Lancaster, Pa., are at the Ridgewood for an indefinite period.

Father McDermott, who is a guest of the Ridgewood for a part of the winter season, said last mass at Father O'Boyle's church Sunday and gave a strong sermon on the faith, which was heard by a large number of his friends at the hotel and others.

Mrs. Lawrence B. Mills and young son of Gloversville, N. Y., arrived yesterday at the Ridgewood. Mrs. Mills is a daughter-in-law of Judge Mills of South Ridgewood avenue.

Frank Weber, assistant manager of the Ridgewood, says he will tell the world that the new high pressure heating plant installed in the hotel last year certainly has "brightened the corner" during the cold spell and kept the guests smiling all the while.

SEASIDE INN**PRINCE GEORGE**

Wearing an aviator's suit and looking as if he had just come in from a long flight, a tall, blonde and rather handsome young man registered at the Prince George Hotel Saturday evening as Richard Marvin from Savannah. He got dinner, a night's lodging and breakfast Sunday morning and walked out leaving his bill unpaid, according to Manager W. W. Hilyard, who today issued a warning to hotel men.

Manager Hilyard has no desire to get bona fide aviators "in Dutch" with hotel men, but he suggested that they keep a sharp eye out for this particular young man.

"This young fellow comes in Saturday and seemed chilled and very hungry as if he had been on a long flight in the cold," said Mr. Hilyard. "He said he had a hydroplane and asked permission to dock it in front of the hotel and said he wished to make nights here. He gave the impression that he had left the plane at his landing place until we made arrangements for it."

"He was such a clean-cut young chap that I felt no hesitancy in making like him, and he looked like an aviator whether he was or not. He told a plausible story about his hydroplane and his plans to make higher from in front of the hotel, but I have

Rainsford for many years was owner of the Bar Z ranch in Montana, which he personally conducted until his health failed.

Mr. and Mrs. William Baxter of New Castle, N. Y., who were at the Princess Isseña for a short stay earlier in the season, have returned from Miami and will remain at the hotel until they leave for a trip to the Mediterranean February 12. They had not intended to return before taking the sea trip, but said they missed Shreveport and the Princess Isseña too much to stay away.

C. K. Smith of New London, Conn., a winter guest of the Princess Isseña, is the proud possessor of a hand-tooled cup which he won yesterday in the Telemoke sweepstakes golf tournament at Ormond Beach. The cup was presented by the Ormond Beach Golf club.

Mrs. F. L. Taylor of Tampa, Dr. Nettie Turner of Philadelphia, and Miss Helen Simmons of Wilmington, Del., are among recent arrivals at the Princess Isseña.

not seen him since Sunday morning, when he left without telling us goodbye.

Mr. Hilyard added that if the young man had only known it he would not have had to tell such a long-winded tale to get a night's lodging, as he would have gladly taken him in and fed him if he had been without funds.

Mr. Hilyard said the young man made no effort to hold him up for anything except a package of cigarettes, which he bought on credit. He is described as being about six feet tall, with blue eyes and brown hair and clear complexion.

John E. Timmons, of New York, millionaire storage warehouse man, and his son Thomas Timmons, spent several days at the Prince George on their way to Palm Beach, where they will spend some time at the Royal Poinciana. This is Mr. Timmons' sixteenth year in Florida.

Mr. and Mrs. W. R. McLeary, Miss Emily McHenry and Mrs. W. S. Newell of Hornell, N. Y., are at the Prince George for their fifth season.

Mr. and Mrs. Joseph A. Jones, of New York, are at the Prince George for a few days. Mrs. Jones is an interior decorator and did the interior decorating for the palatial home of E. King at Daytona Beach. She is on her way to Miami, where she has a number of jobs similar work in some of Miami's millionaires.

Mr. and Mrs. H. C. Starn of Round Brook, N. J., are at the Prince George for their sixth season.

A. K. Brown of Tonawanda, N. Y., who has spent several winter seasons at the Princess Isseña, is back again, resuming our engagement.
